Goldman Sachs

Camunda enables centralized provisioning, modeling, deployment, execution, and monitoring for any workflow throughout the firm.

NatWest

NatWest uses Camunda for 20+ applications across a variety of business groups, automating many use cases that are core to their business.

Desjardins

Camunda helped Desjardins create a better customer and employee experience by orchestrating over 19 hybrid processes that spanned software and people, and incorporating over 30 different types of process endpoints.

Why Camunda

Camunda enables organizations to orchestrate processes across people, systems, and devices to continuously overcome complexity and increase efficiency. With Camunda, business users and developers collaborate using BPMN to model end-to-end processes and run sophisticated automation with the speed, scale, and resilience required to stay competitive. Hundreds of enterprises such as Atlassian, ING, and Vodafone design, orchestrate, and improve business-critical processes with Camunda to accelerate digital transformation. **Learn more, visit camunda.com**

The Process Orchestration Platform

Design & Implement
Developers & business users collaborate to design & configure processes with Camunda.

Test & Deploy
Developers & testers ensure the end-to-end process is working as intended.

Manage
Full governance over your installation and platform usage.

Improve
Teams have the insights to fix the highest ROI problems for their business processes.

Automate
Enterprise-grade automation platform. Built for today's business complexity, loved by developers.

C

Process Orchestration Platform
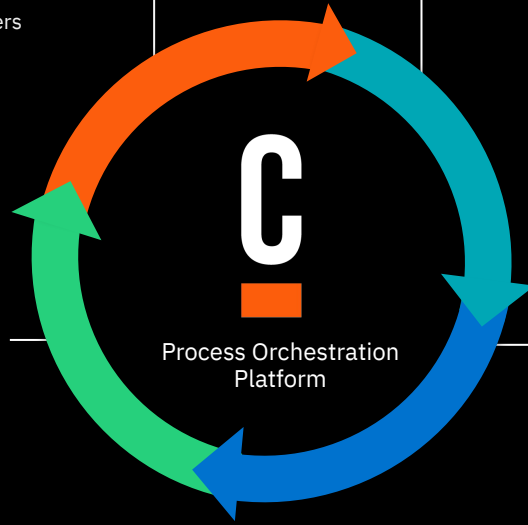

Next Generation Workflow Technology
Cloud-Native and highly scalable to support digital business models.

Highest Support for BPMN Standard
Better collaboration between business and IT to speed up development.

Open Architecture for more Flexibility
Fits into your environment and can be custom tailored to your needs.

Reusable Components for Solution Acceleration
A rich library of out of the box components to increase developer productivity.

Camunda's cloud-native design provides the performance, resilience, and security enterprises need to future-proof their process orchestration efforts.
