Camunda Optimize

Our integrated **Business Intelligence Tool**

For **Business Users** …

provides features to obtain **Insight** from **BPMN/DMN Execution Data** …

for seamless **Business Operations** and continuous **Process Improvement** …

Fully Integrated with the Camunda Process Engine.

Use Cases

Business Operations Monitoring

Near real time monitoring and alerting to ensure process health.

Measure adoption

Measure and increase process automation within an enterprise.

Business Reporting

Reporting on business operations day by day and compared to previous months and years.

E2E Process Optimization

Ingest data from other systems to Optimize processes End2End.

Process Improvement

Analytics to measure and improve processes / rules and human tasks.

Share Data to implement AI Use Cases

Provide process execution data to for other use cases (e.g. ML; AI)

Customer Comments

"We do not have the developer capacity to introduce Optimize yet."

"We are producing manual reports."

"We have to use Power BI, because it is a company wide decision."

"We don't want to see impacts on the performance."
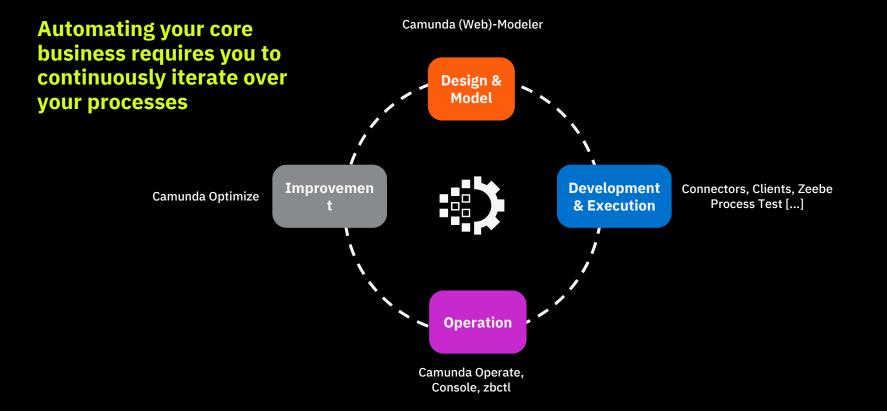

"Business is happy when it runs!"

CCS
2023

Optimize aims to provide <u>current</u>, <u>accurate</u>, <u>complete</u> and <u>unbiased</u> data from your processes

Process Automation Cycle
