The_good_team

The BPMN mapping team should contain:

- At least two developers
- Product manager
- Product owner

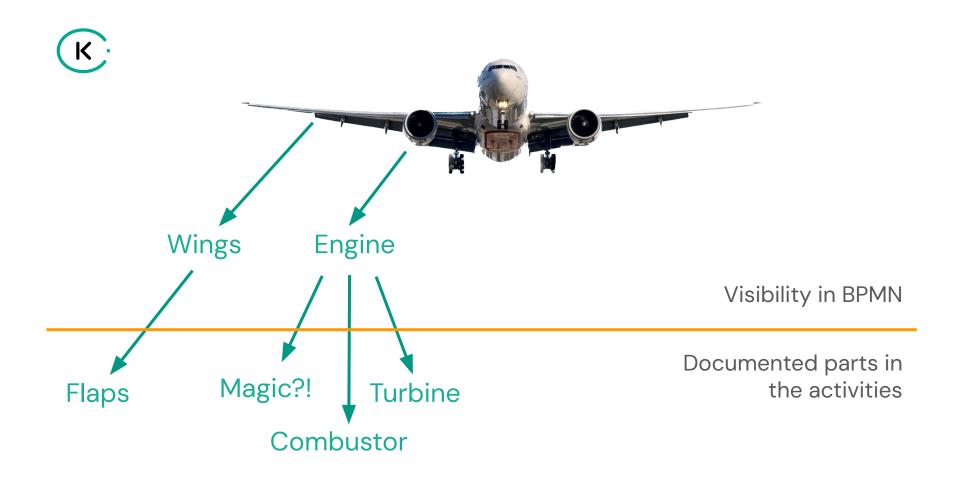

My product manager (cleaned the BPMN to final version) My team leader (did the first BPMN) > { [[) << ;) { # % ::

The_challenges

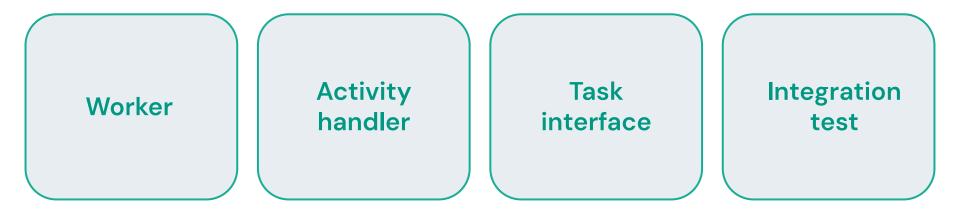

Slice the codebase to activities

Codebase changes over time as business needs

31 activities in the end

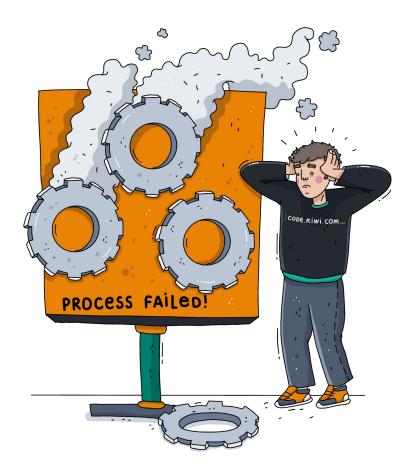

(types of service tasks)

Data mining

- We logged every API Request/Response
- 81% of cases happened in 18 scenarios
 - **26000** scenarios are due to loops
- We were able to obtain from logs **all 18** API communications

Key features of testing

- Everything auto-generated from logs
- Possibility to replay any future error
- Possible to breakpoint

WAS TESTING USEFUL?

YES.

Processes daily

Process errors up till now since July 2022

Migration of system happened without single error Developer error (I did one typo in process name) > { [[) << ;) { # % ::

Benefits

- Everyone understands each other
- Everything is documented
- We can debug faster and easier
- Activities are reusable
