

# 13 Reasons You Want Camunda Platform 8 Enterprise Edition

## Get process orchestration that scales with your business

- 1. Unlimited process model deployments:** Create and deploy as many BPMN process models as your business requires to orchestrate complex business processes across people, systems, and devices.
- 2. Unlimited decision table deployments:** Save time and reduce errors by automating business decisions. Create and deploy unlimited DMN decision tables as part of your business processes.
- 3. Support for high-volume process and decision instances:** Take advantage of Zeebe, the workflow and decision engine that powers Camunda Platform 8, to execute high volumes of process and decision instances at consistent low latencies.
- 4. Unlimited modeling users:** Bring IT and the business together to create executable process models and decision tables. Onboard new teams without additional licensing fees or administrative overhead.
- 5. Enterprise-grade customer support:** Count on priority response times from our Technical Support team, with optional 24x7 availability.
- 6. Production use of Tasklist, Operate, and Optimize for Camunda Platform 8 Self-Managed:** Orchestrate human tasks, monitor and troubleshoot processes in production, and get the analytics you need to continuously improve your processes.
- 7. Support for high-volume task users:** Orchestrate high-volume human workflows with an out-of-the-box, web-based application for tasks that need to be done by people.
- 8. LDAP and Active Directory integration:** Connect Camunda Platform to Active Directory or any other LDAP server for easy identity and access management.
- 9. Support for single sign-on:** Allow teams to access Camunda Platform quickly and easily by connecting to your single sign-on provider.
- 10. Customer success management:** Work side-by-side with a dedicated Customer Success Manager to achieve your process orchestration goals.
- 11. Remote consulting:** Collaborate with experts to integrate Camunda Platform into your technology stack, create optimized process models, and ensure your implementation is architecturally sound.
- 12. Custom training:** Get up to speed on BPMN, DMN, and process modeling best practices with private classroom training for anyone who creates, deploys, or maintains business processes in your organization.
- 13. Annual payment plans:** Negotiate terms up-front so you don't encounter unexpected volume fees.
