

Camunda Days

v2. Released Q2, 2023

Solution Acceleration

Accelerating time to value

Create Solutions Fast

Scale Teams Quickly

Scaling teams to create solutions fast

Accelerated Modeling

Connect to everything

Flexible Cloud Architecture

Monitor, Operate & Scale

Scaling teams to create solutions fast

Accelerated Modeling

Connect to everything

Flexible Cloud Architecture

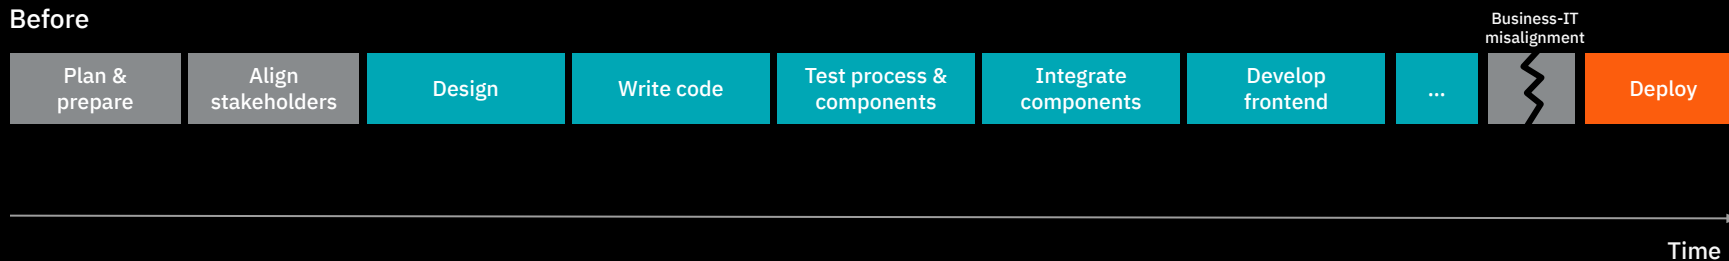

Monitor, Operate & Scale

Process Development Lifecycle

Solution accelerators speed up time-to-automation to solve complex business problems

Before

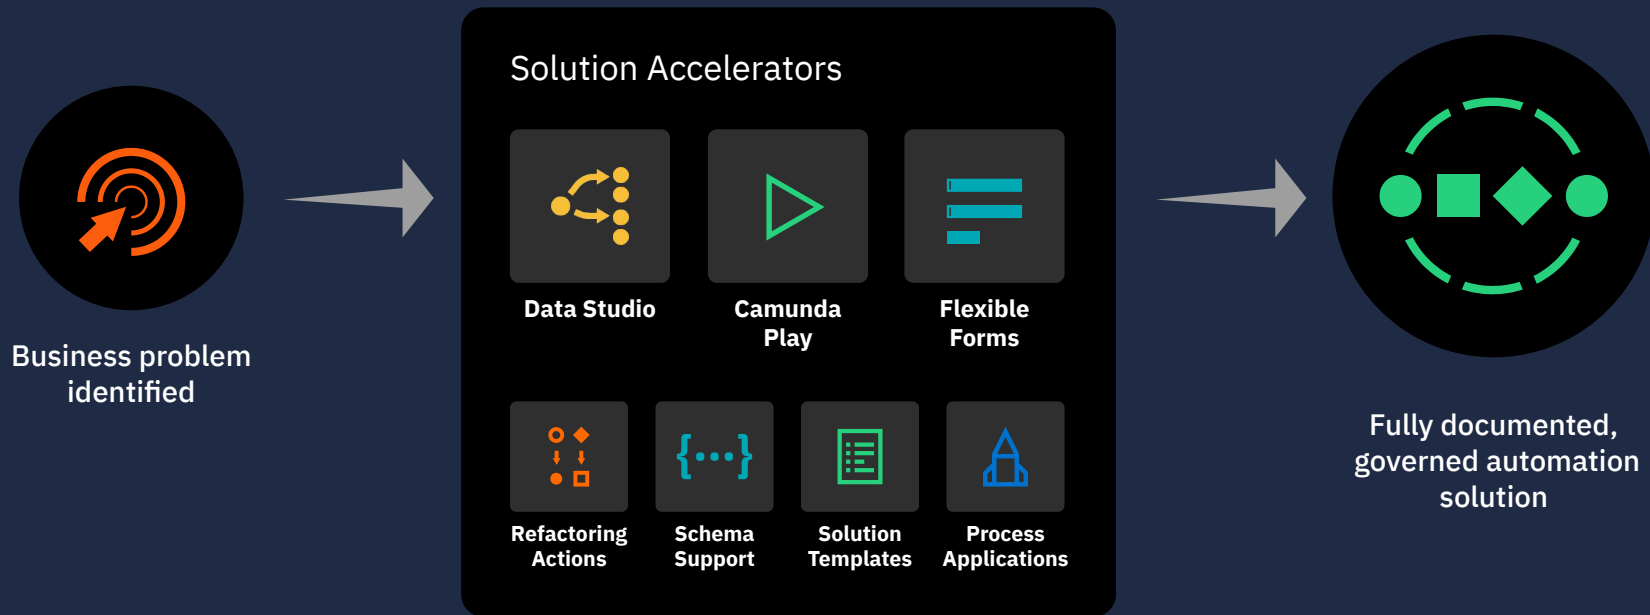

With Camunda's Solution Accelerators

Accelerated Modeling

Collaboratively design, implement, and publish process applications

Accelerated Modeling

	8.2 Delivered	8.3	Future
Design	FORM Editor & Tasklist Improvements and API	Data Studio	Document Management Integration
Implement	Design, Implement <i>Play Modes</i>	Helpful Warnings	Customer Specific Debug Rules
Publish	Process Applications	DMN 3.0 / Standalone Deployments	Custom Modeler Plugins
	Web Modeler	Web Modeler API	Customer Specific Process Templates

BPMN 2.0 Symbol Support in C8

Powerful symbols for state-of-the-art processes and unbeatable scalability

8.2

Escalation Events

Undefined Tasks

Data Store & Objects

Link Events

FEEL Support for Script Tasks

Next - 8.3

Compensation Events

Conditional Events

Signal Events

Future

Call Activity Variable Mapping

OR Gateway - Converging

BPMN Message Throw Simplification

Interrupting Timer Start Event supports Duration

Scaling teams to create solutions fast

Accelerated Modeling

Connect to everything

Flexible Cloud Architecture

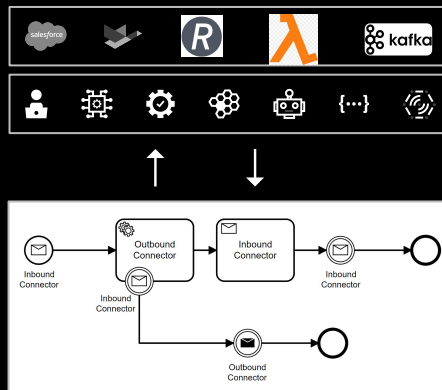

Monitor, Operate & Scale

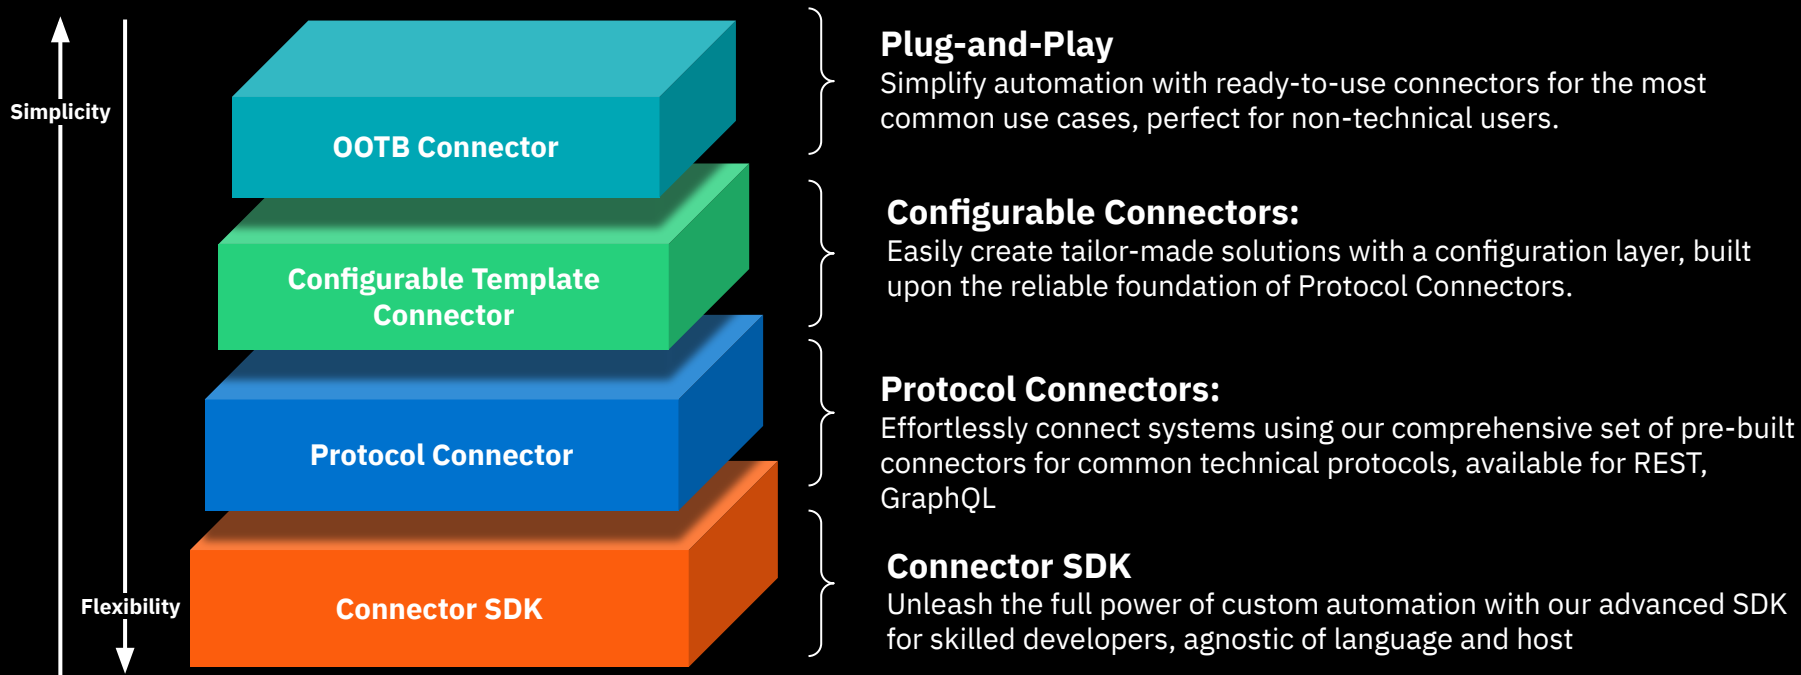

Connectors

- An **outbound connector** lets the Process invoke some outside system to do something
- An **inbound connector** means the process can be triggered by some outside system

Connectors Integration

Intuitive, Scalable, and Customizable Multilayer Coding Architecture for Every User

Ready for Marketplace

REST

Invoke REST API

Sendgrid

Send an Email via Sendgrid

Slack

Create a channel or send a message

Microsoft Teams

Send or update a message

GDrive

Create a folder or file from template

Automation Anywhere

Orchestrate your RPA bots

UiPath

Orchestrate your RPA bots

Kafka Producer

Produce Kafka message

Amazon SQS

Send message to queue

AWS Lambda

Invoke a function

Amazon SNS

Send message to topic

Rabbit MQ

Send message

GraphQL

Execute GraphQL query

Power Automate

Orchestrate Power Automate flows

Curated Connectors Marketplace

Create + share connectors on both a private and public marketplace

Connectors

8.2 Delivered

8.3 Oct

Future

Low Code

Low Code: JSON
Template Connectors

No Code: Save as
Reusable template

No Code: Template
Generator

Types

REST Inbound

Subscription / Polling
Inbound

Inbound Intermediate
Events

Reusable

RPA, Power Automate,
SQL*

Inbound (Event Models: Kafka,
Amazon SNS, Eventbridge)

NLP, Docusign

TBD (based on
categories)

Ecosystem

Awesome list in Github

Share Connectors within
your organization

Public / Private Marketplaces

Scaling teams to create solutions fast

Accelerated Modeling

Connect to everything

Flexible Cloud Architecture

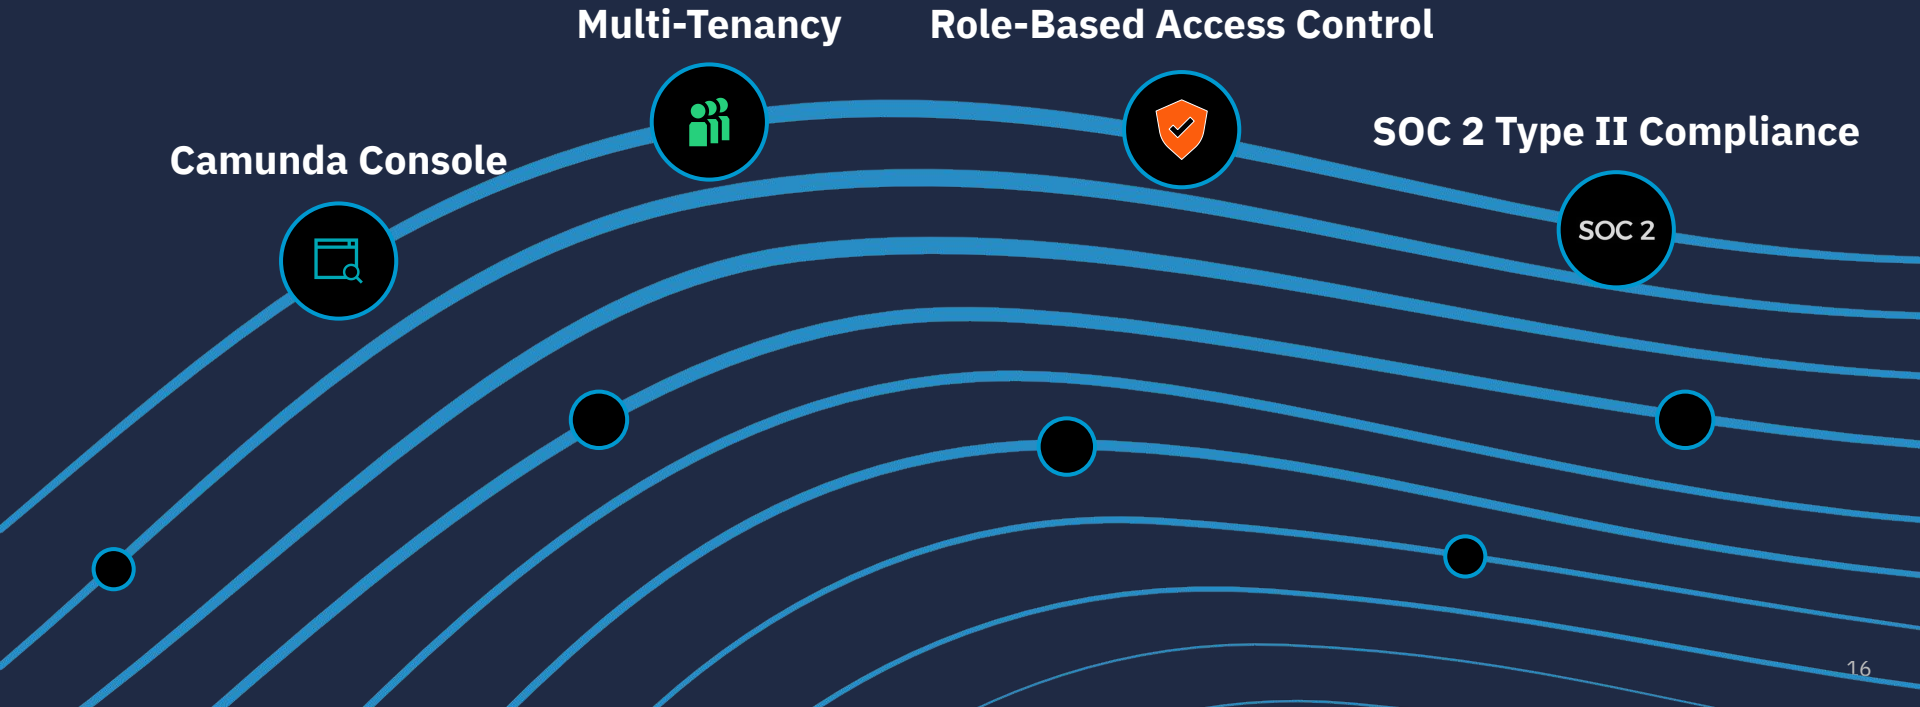

Monitor, Operate & Scale

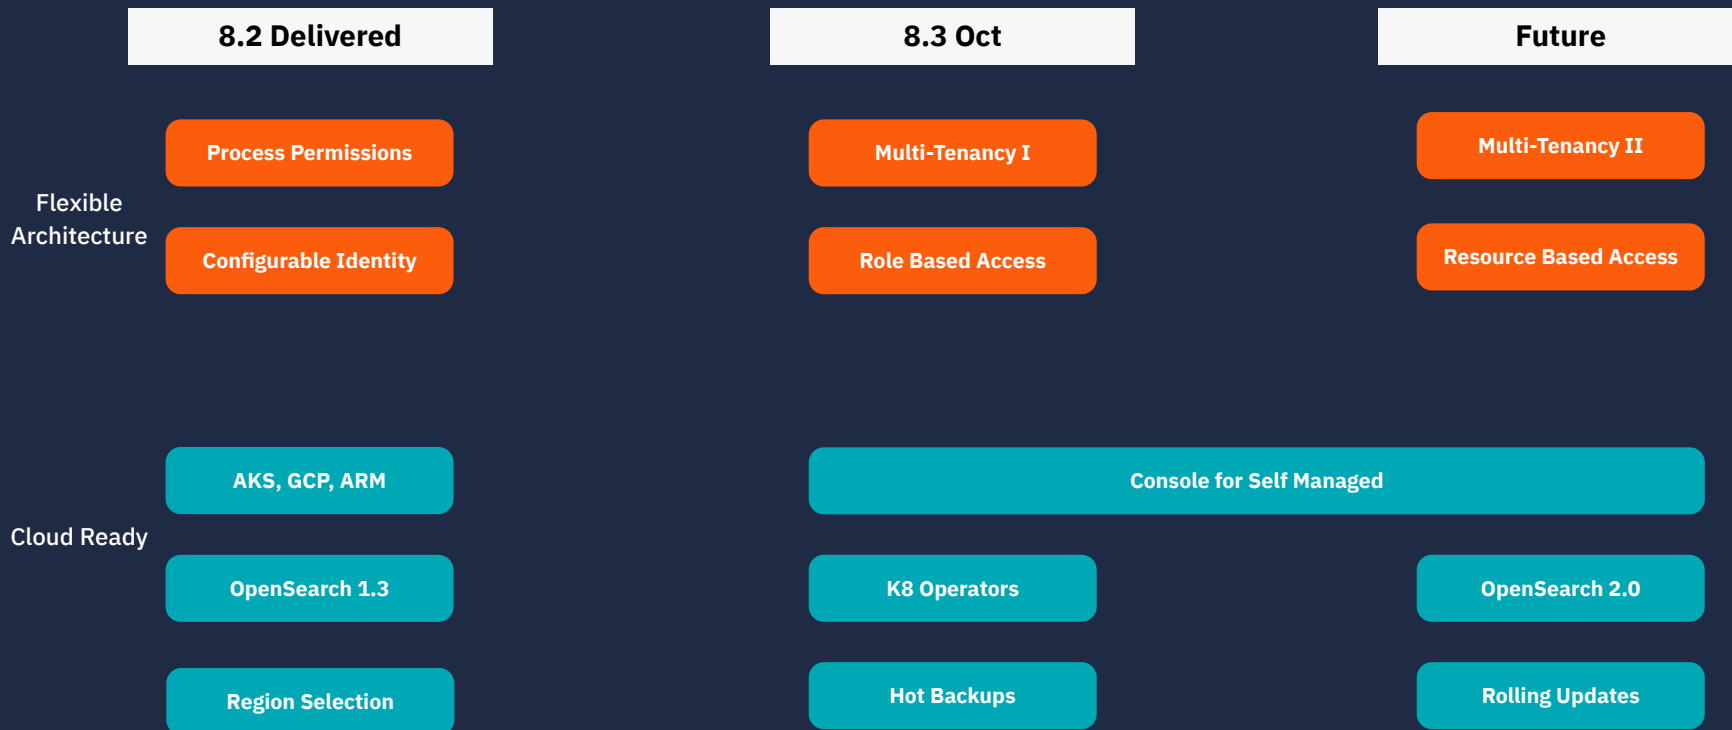

Flexible Cloud Architecture

Meet your security and governance requirements with a highly configurable architecture

Flexible Cloud Architecture

Scaling teams to create solutions fast

Accelerated Modeling

Connect to everything

Flexible Cloud Architecture

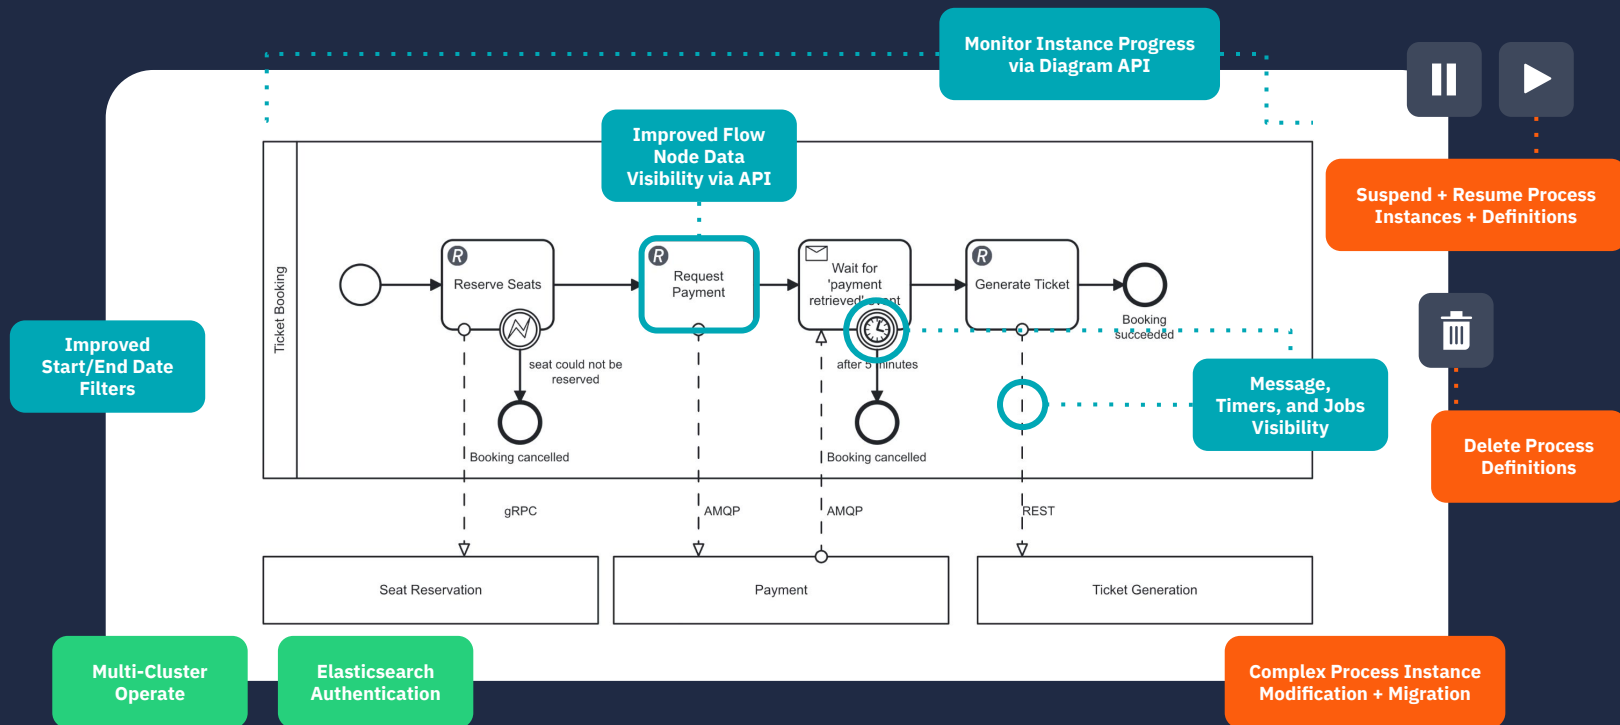

Monitor, Operate & Scale

Monitor, Operate, & Scale

Observe your processes with end-to-end visibility

Scaling teams to create solutions fast

Solution accelerators speed up time-to-automation to solve complex business problems

Accelerated Modeling

Connect to everything

Flexible Cloud Architecture

Monitor, Operate & Scale

Camunda C7 Maintenance

Camunda Full Support

Until April 2027

- Incremental feature improvement
- Critical security / bug fixes
- Maintain supported environments

Camunda Extended Support

2027+

- Critical security / bug fixes
- Maintain supported environments

Automation Platform 7

	Now (7.19)		Next (7.20)		Later	
Improve database management	HTTL mandatory for process deployment	Inform how to set HTTL	Dedicated retry configuration for clean-up		Clean standalone User Operations Log	Manage history cleanup in Cockpit
New major versions	Wildfly 27 (Jarkarta EE 10)		Spring 6 / Spring Boot 3	Support Quarkus 3.x	Groovy 3 / 4	
Customer Requests	LDAP paging for identity-ldap-plugin	Update event trigger for message catch events	Unassign users from group	Non-admin can un-assign group from users	Configure HTTP Client in external task	
	Change job due dates for retries	Badge for open incidents in history view	Support DMN 1.4 namespace	Allow to skip IOMappings for batch delete operation	Usage metric reporting in Cockpit	
	Support for ARM Docker images	Log log-in and out attempts	Support Cloud SSO for Spring	Clarify hierarchical flag		
		Fire historic task update events	Pagination and filtering for processes overview in cockpit			

All details: [Release Notes - camunda JIRA](#)

Release Cadence

7.19 / 8.2 Released April 11, 2023

- Minor versions released every 6 months
- Alpha versions released once a month
- Patch versions released at least once a month

Camunda Platform 7.20 / 8.3

October 10th 2023

Camunda Platform 7.21 / 8.4

April 9th 2024

Camunda Platform 7.22 / 8.5

October 8th 2024

Thank you for partnering with us
