

Unlock Process Orchestration Potential with Camunda Marketplace

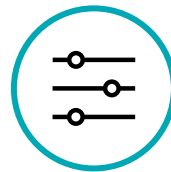

Camunda Marketplace is a trusted source of integration technologies that help you quickly and reliably orchestrate complex business processes across your entire technology stack. Marketplace makes it easier than ever to discover Connectors, install and customize them, and share your own Connectors with other Camunda users.

Discover

Browse a wide variety of Connectors built by Camunda, our partners, and the community. From protocols such as REST

and GraphQL, to RPA and message queue technologies, to enterprise applications and productivity apps — you can find Connectors that will help you orchestrate your most critical business processes from end to end.

Customize

After installing a Connector, you can customize it by adjusting defaults or changing properties, or even preconfigure it for your

specific needs and save it as a new custom Connector. Users can customize Connectors and create new ones directly in the Web Modeler's template editor.

Install

Marketplace makes it easy to install Connectors in your Camunda SaaS account with a few clicks or download

Connectors for installation in your Camunda Self-Managed setup.

Contribute

Join Camunda Marketplace by submitting Connectors that you've built for your favorite technologies and get feedback

from the global community of Camunda users and partners. Collaborate with other Connector developers to share ideas and innovate.

Join Camunda Marketplace today by submitting your Connectors

Maximize Visibility of Your Connectors

Submitting your Connectors to Camunda Marketplace ensures maximum visibility by making your innovations available to the global community of Camunda users and partners.

Collect Feedback and Improve

Making Connectors available to others allows you to collect feedback and uncover potential improvements. Camunda Marketplace helps drive the evolution of your Connectors' capabilities.

Collaborate and Innovate

Work with Connector developers to brainstorm ideas, share best practices, and innovate on new features and functionality. Avoid duplicate work by collaborating with other Camunda experts to develop integrations for commonly used technologies.

About Camunda

Camunda enables organizations to orchestrate processes across people, systems, and devices to continuously overcome complexity and increase efficiency. With Camunda, business users and developers collaborate using BPMN to model end-to-end processes and run sophisticated automation with the speed, scale, and resilience required to stay competitive. Hundreds of enterprises such as Atlassian, ING, and Vodafone design, orchestrate, and improve business-critical processes with Camunda to accelerate digital transformation.
